

# INTERNATIONAL ASSOCIATION FOR THE PLANT PROTECTION SCIENCES

**IAPPS**  
March 2007

## “Short” Notes from the IAPPS Secretary General

Please note that details regarding the upcoming **XVI International Plant Protection Congress to be held at the SECC, Glasgow, Scotland 15-18 October** can be found on the BCPC website <http://www.bcpc.org/>.

As I mentioned last month IAPPS has signed an agreement for the 2011 IPPC. Yes, we have signed an agreement with APS (The American Phytopathological Society) to hold the 2011 meeting in Honolulu, Hawaii. Details regarding our agreement are described below. Dr. Bill Tweedy, Chair for the 2011 IPPC will begin planning soon and he will be looking for help from IAPPS members.

I again welcome new members who have joined IAPPS this last month. We welcome each of you and look forward to your contribution to Global IPM via IAPPS. I appreciate those who respond to my request regarding their professional activities so that I can share them with IAPPS members via this Newsletter. I am pleased to be able to provide a note from one of our newest members, Tinatin Doolotkeldieva of the Kyrgyz Republic who describes the research activities of her team of scientists at the Kyrgyz Turkish University.

Spring arrived early in the northern hemisphere and the roses and flowering trees were all in bloom when a severe frost, lasting several days, killed the new growth. Most plants recovered once it warmed up but some did not and this means replanting of flowers and ornamental plants in the yard. This year I have planted tomatoes and cucumbers for the first time in many years so I will get some practice in vegetable IPM. I am hoping for good cooperation by the biological control agents in my plantings.

A rose plant in my yard whose foliage has been killed by the frost with a new green shoot appearing

# XVI International Plant Protection Congress

15 - 18 October 2007 Scottish Exhibition & Conference Centre, Glasgow, Scotland, UK

In association with IAPPS and the BCPC International Congress & Exhibition

## The 2007 Congress

BCPC and the International Association for the Plant Protection Sciences (IAPPS) are delighted to announce that the XVI International Plant Protection Congress (IAPPS) is to be held in association with the BCPC International Conference & Exhibition – Crop Science & Technology 2007. IAPPS Congresses are held every four years at different locations around the world – the last one was hosted by the China Society of Plant Protection in Beijing – so BCPC welcomes IAPPS delegates to Glasgow. As a result, the BCPC Congress in 2007 will be a much expanded event with the scientific programme extended and running for a full four days. The annual BCPC event is already acknowledged as the main event in the crop protection calendar – so the 2007 Congress will be an event not to be missed.

See the BCPC website <http://www.bcpc.org/> for details:

## XVI International Plant Protection Congress

In association with IAPPS and the BCPC International Congress & Exhibition

The XVI International Plant Protection Congress is to be held at the SECC, Glasgow UK, from 15 to 18 October 2007.

With over 40 platform sessions, discussion fora and debate, fully supported by complementary poster sessions, this Congress promises to be an essential event for all interested in crop protection and crop production.

**The American Phytopathological Society  
and  
International Association of Plant Protection Sciences (IAPPS)**

**LETTER OF AGREEMENT  
for 2011 Joint Meeting**

The American Phytopathological Society (APS), and the International Association for Plant Protection Sciences (IAPPS) are considering a joint meeting for August 6 – 10, 2011. The APS Council has approved Honolulu, Hawaii as the site for the 2011 APS Annual Meeting. IAPPS estimates that approximately 600 of their members will attend this meeting. This number does not include attendees who may be members of both Societies.

This joint meeting requires considerable planning and cooperation as well as a clear understanding of the financial responsibilities to ensure a successful meeting for all concerned. The following points are meant to spell out how specific arrangements will be managed and to prevent any misunderstandings.

All parties agree to the following:

***Location and Contracting***

- APS will secure the location and contract the facilities for the 2011 meeting. Per anticipated attendance by IAPPS, APS will secure an additional 180 sleeping rooms to accommodate IAPPS attendees.
- This meeting is a joint meeting with APS and IAPPS. APS has negotiated adequate meeting space to accommodate the APS meeting at the Hawaii Convention Center. With the exception of the meetings list on the last page of this agreement, no additional meeting space is being contracted specifically for IAPPS. Should IAPPS need additional space that APS can not accommodate; IAPPS will be responsible for any meeting room rental that is incurred for the additional space. IAPPS would work with APS to secure the additional space needed.

***Coordination***

- IAPPS will provide the name of their program chair and one/two other key contacts to receive all memos, timelines, and other pertinent information. These contacts will communicate with the other members of their organization in a timely manner. Most communication will be through email.

- The APS Director of Meetings, Meetings Manager, and APS headquarters staff will be responsible for all logistics and management of the meeting. Direct communication with and working with all hotels, the convention center, and any other vendors or suppliers will be made by APS staff contacts. Any special meeting requests for IAPPS must be communicated to the APS Director of Meetings or Meetings Manager.

## ***Financial/Registration/Fees***

- The Joint Meeting budget will be developed by APS staff and made available to the key contacts upon Council approval.
- Funding for speakers shall be provided by both APS and IAPPS. (APS funding for speakers comes from the society and not from meeting registration.) APS will provide funding for APS special sessions, IAPPS for IAPPS special sessions. Since some of the proposed symposia will have strong components for both societies, the IAPPS Program Chair and APS – Special Programs Board will negotiate appropriate levels of symposia funding from each Society.
- APS and IAPPS agree to charge the same registration fees for the joint meeting. Registration fees will be determined by APS staff and approved by the APS Council in consultation with IAPPS. Should APS or IAPPS offer events that are not normally a part of the APS Annual Meeting, each event will be charged a separate fee on the registration form to cover the cost. If a similar separate event is offered by each society that is covered in the registration fee (ie. Closing Party), no additional fees will be charged if the cost per person is of equal value. Should the cost per person be higher for one society than the other society, a separate additional fee to compensate for the difference in cost per person will be charged on the registration form for that event to cover the costs of that event.
- Meeting registration categories will provide a discounted registration fee for APS and IASSP members compared to the nonmember fee which is currently \$60 higher than the member fee (subject to change).
- Any tickets sold to guests, spouses, etc. for events/activities that are included or not included in the registration fee will be charged a separate fee per event on the registration form.
- Meeting Registration will be coordinated by APS through the APS website and printed registration form. Individual and joint memberships will be tracked and shared with each organization post-meeting. If there are special tracking requests for the society, these must be communicated to Betty Ford or Tara Schaefer at APS Headquarters no later than December 15, 2010.
- The registration list of attendees will be provided and available for APS and IAPPS to use.
- IAPPS has the option to participate or not participate in the profit/loss sharing for this joint meeting. **This final decision must be made, based on mutual consent by January 2009.** If IAPPS chooses not to participate, all income and expenses/profits or loss for the meeting are the responsibility of APS. If IAPPS chooses to take part in any profit or loss sharing for the meeting with APS, the

following formula will be used.

- IAPPS only Member Attendees +  $\frac{1}{2}$  of the APS/IAPPS Joint Member Attendees/total attendance = % of loss or gain. IAPPS will share in the profit/loss of the meeting budget.
  - Example – 1500 total meeting attendees, 1100 APS members only, 150 APS and IAPPS members, 250 IAPPS members only. Formula example - IAPPS 250 members plus 75 ( $\frac{1}{2}$  of APS/IAPPS joint members) = 325 total for IAPPS which is 21.6 % of the total attendance. In this example, IAPPS would share 21.6% of the profit of the meeting after all expenses, or 21.6% of the meeting loss, after all expenses.
- Purchasing and distribution of any items to members for use by only by one of the societies is the responsibility of that society.

### **Promotion**

- A joint meeting logo will be developed by APS that will incorporate the initials of each Society in the logo. Where appropriate in print materials and promotion, the logo and full names of each Society will be used.
- Promotional and registration materials, the program book, and APS abstract book will be designed and produced by APS.
- IAPPS will provide to APS HQ by April 1, 2010 and updated November 1, 2010 their full membership lists for both mail and email promotion of the meeting. The lists will only be used to promote the 2011 joint meeting.
- APS will provide the meeting website link to IAPPS for addition to the IAPPS website.

### **Abstracts Submission and Printing**

- Abstracts for APS and IAPPS will be submitted through the APS website. The current established fee for abstract submission is \$55 per abstract. This fee is paid by the submitter of each abstract. This fee is subject to and for future meetings at the discretion of APS Council.
- APS and IAPPS Abstracts: APS and IAPPS abstracts will be published in the June Supplement of *Phytopathology* with the overrun of the printing to be distributed as an abstract book at the meeting. (This is based on the current system of printing and will be adapted to changes, if necessary, in technology and transfer of information.)
- IAPPS may ask some authors to submit full papers to their journal, *Crop Protection*
- APS and IAPPS abstracts will be searchable on the meeting website.

## ***Program, Meeting Content and Planning***

- APS and IAPPS will jointly develop the program and its content under the direction and coordination of the APS and IAPPS program chairs.
- Any changes or additions to the established program must be approved in writing by the APS Director of Meetings, APS Program Chair, and IAPPS Program Chair.
- Pre- or post-meeting tours, field trips, and/or workshops (Friday and Saturday) will be assessed on a fee/person basis separate from meeting registration receipts and will be completely self-supporting. Current minimum pricing is \$15/person for each Pre- or post-meeting tours, field trips, and/or workshops.
- The Opening Reception (Sunday) will be a joint reception with APS and IAPPS. A separate ticket will be available for purchase for a fee to those wishing to attend who are not registered for the meeting. Currently this reception includes cash bars and hors d'oeuvres stations.
- The Plenary Session (Sunday) will be organized by APS and IAPPS Presidents.
- IAPPS Submitted Oral Presentations – Abstract Submissions – IASSP will submit subject categories – to be adjusted as much as possible with APS - to APS by April 2010.
- Submitted Posters - IAPPS Posters will be placed joint with APS posters by scientific section). It is the responsibility of the author to identify the poster with a IAPPS logo or label, if desired.
- The Closing Party (Tuesday) will be a joint party with APS and IAPPS. A separate ticket will be available for purchase for a fee to those wishing to attend who are not registered for the meeting. Currently this party includes cash bars, drink ticket, buffet meal, and entertainment.

### **Exhibits**

- The APS Annual Meeting has an exhibition that currently averages approximately 35 exhibits. Should IAPPS have suppliers who would be interested in exhibiting at the 2011 meeting, the contact information for those suppliers needs to be provided to the APS exhibit sales staff by June, 2010.

**APS will work with IAPPS to provide the following without additional costs to IAPPS:**

- IAPPS Executive Board Meeting with coffee/pastries/lunch.

- IAPPS Committee Meeting rooms.
- Table near registration for IAPPS to use as an information desk.
- IAPPS Booth area: APS will provide an area adjacent to APS Press for IAPPS's use during the time the exhibit hall is available for the meeting for the any IAPPS merchandise, membership, promotion, etc. IAPPS is responsible for maintaining this area, staffing, and sales.
- IAPPS President's Reception: Room, food, and drink for a maximum of 50 invited guests.
- IAPPS Business Meeting Room.
- IAPPS Awards Program Meeting Room, if applicable.

With signature this agreement (five pages) will be in place for the 2011 APS/IAPPS Joint Meeting.

**Research activities of the team of Tinatin Doolotkeldieva, Biologist**  
**Department of Food Engineering, Kyrgyz - Turkish University**  
**Bishkek, THE KYRGYZ REPUBLIC**

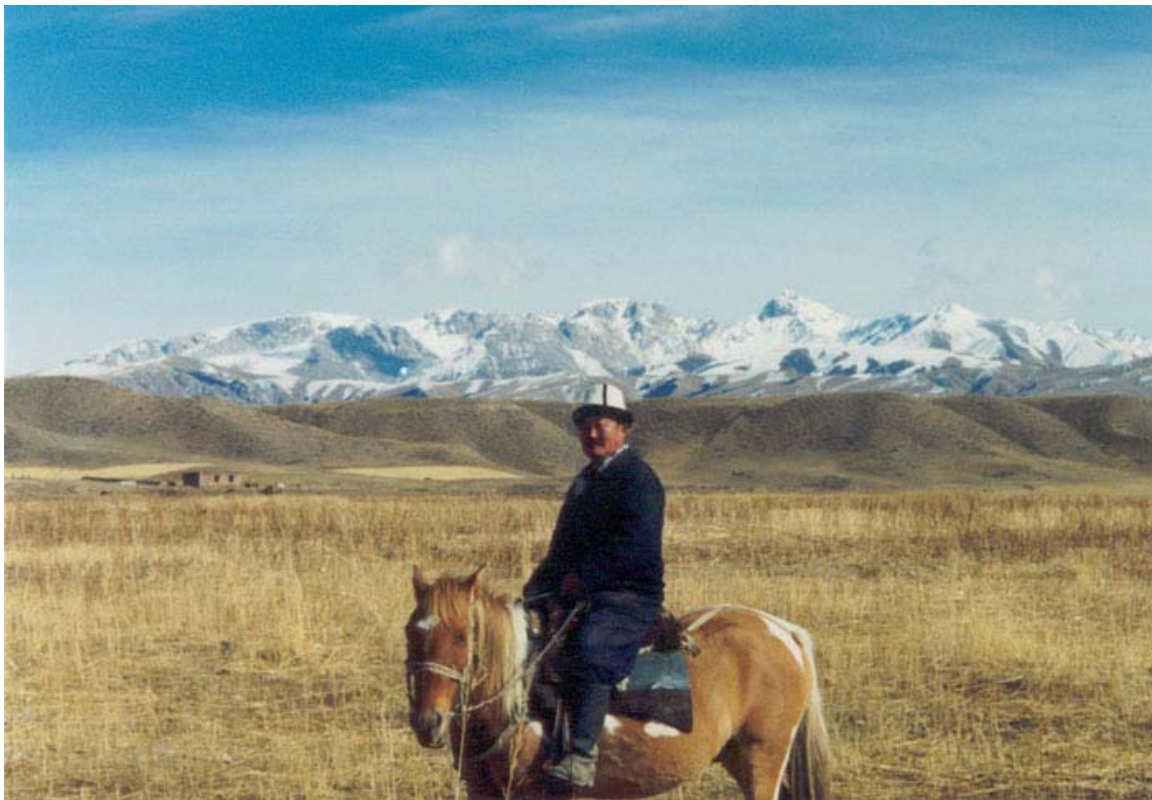

The goal of Tinatin's research team is to develop non-chemical crop protection strategies using natural antifungal agents i.e. antagonistic microorganisms or antifungal metabolites from microbial origin:

- Metabolites of ***Streptomyces*** strains as antifungicide and growth-stimulating biocontrol agents for protection of forest and agricultural plants
- Metabolites of ***Pseudomonas*** strains as bio stimulators and antifungicidal biocontrol agents for protection of the rhizosphere of agricultural plants.
- Metabolites of ***Trichoderma*** strains as antagonist agents for protection of agricultural plants from root-associated phytopathogens
- Metabolites of ***Bacillus thuringiensis*** strains for development of insecticide biopreparations for management of pests on forest and agricultural plants.

## IAPPS NEWSLETTER IN SPANISH !

Thanks to the personal effort of our IAPPS Governing Board member and Coordinator for Region VIII (Latin America/Caribbean), Dr. Segenet Kelemu, and to the translation services of her administrative assistant, Ms. Melissa Garcia, the IAPPS Newsletter will be available in Spanish (*Boletín de Noticias de la IAPPS*) starting with the March 2007 issue. The translated version will be available on this website only.

I wish to thank again Segenet and Melissa for this excellent initiative.

## THE UK PESTICIDE GUIDE 2007 - PROVIDING MORE SOLA INFORMATION THAN EVER BEFORE

The latest editions of *The UK Pesticide Guide* and *The e-UK Pesticide Guide* now offer farmers and growers, particularly those growing minor crops, the latest and most comprehensive information on specific off-label approvals (SOLAs) in one printed publication. A total of 705 new SOLAs have been added this year to what is the most authoritative and invaluable pesticide guide, of UK approved products, for agriculture, horticulture, forestry and amenity use.

Both publications offer invaluable, detailed information on over 1,300 pesticide products in active use, including nine new active ingredients such as prosulfocarb, aminopyralid, dimethenamid and fluopicolide. There is also reference to over 1,000 more products that are registered. The latest developments, following the conclusion of the first five years of the Voluntary Initiative program, are also covered.

"This bumper 20th edition *The UK Pesticide Guide*, contains 40 more pages than last year, and aims to ensure that users have all the most up-to-date information available to them throughout the main spraying season," explains the editor, Dick Whitehead. "As approved uses on product labels do not cover every pest or crop eventuality you may not be able to control a pest using a current on-label approval and a SOLA may need to be applied for. That is why, for the 2007 UK Pesticide Guides, we have focused on helping users meet their Statutory obligation to possess a SOLA notice before treatment and the CD-Rom version provides direct links to the SOLA notices at the Pesticides Safety Directorate (PSD) website as well as to the online database on Maximum Residue Levels (MRLs).

The Guides also contain information on the latest legislative changes and environmental guidance to help users complete Crop Protection Management Plans. And, to ensure that users have access to the latest information all the year round, free online news updates will be shown on the dedicated website at [www.ukpesticideguide.co.uk](http://www.ukpesticideguide.co.uk)."

According to Prof. Graham Matthews, Editor of Crop Protection, "This annual publication continues to be enlarged to cope with the changes in pesticide use and reflects the developments in pesticides over the last 20 years since the first edition was published, the diversity of products now available and the impact of current legislation. This new edition has nine new active ingredients among the 1330 products that will be available during 2007. The most important aspect of this edition relates to the termination within the UK of the long term arrangements for extension of use (LTAEU) which has resulted in more individual products being covered by Specific off-label approval (SOLA). This is increasingly important as manufacturers concentrate on the major markets for their products while growers still need help with pest management decisions and pesticides for use on minor crops. The layout of the book remains essentially the same as in the previous edition with profiles of individual active ingredients occupying most of the 685 pages. Some of the information is provided by using key symbols which are explained in detail in Appendices. With environmental concerns becoming more important, Appendix 4 provides a Key to Hazard Classifications and Safety Precautions. The book is essential for all those who are using pesticides within the UK, but as a source of information on the suitability of products for individual crops, it retains worldwide significance to those countries where there is less advice available."

BCPC and CABI, are the joint publishers of the 2007 editions of these publications. *The UK Pesticide Guide 2007* costs £37.50 and *The e-UK Pesticide Guide 2006* costs £61.69 (inc. VAT) for a single use copy. Prices for network users are available on request. Copies can be ordered from:

The IAPPS Newsletter is published by the International Association for the Plant Protection Sciences and distributed in *Crop Protection* to members and other subscribers. *Crop Protection*, published by Elsevier, is the Official Journal of IAPPS.

IAPPS Mission: to provide a global forum for the purpose of identifying, evaluating, integrating, and promoting plant protection concepts, technologies, and policies that are economically, environmentally, and socially acceptable.

It seeks to provide a global umbrella for the plant protection sciences to facilitate and promote the application of the Integrated Pest Management (IPM) approach to a the world's crop and forest ecosystems.

Membership Information: IAPPS has four classes of membership (individual, affiliate, associate, and corporate) which are described [here](#).

The *IAPPS Newsletter* welcomes news, letters, and other items of interest from individuals and organizations. Address correspondence and information to:
