

SUMMER ASSISTANT

A Summer Assistant is needed for **NEBRASKA CROP AND SOIL SYSTEMS, INC.**, a Crop Consulting firm in East Central Nebraska. The work involves following various irrigated crops (but principally corn) through the entire growing season. Duties include inspecting fields and describing insect problems, diseases, nutrient disorders, physical problems, and weeds as they develop. Long hours are involved. The pay is generous. Applicants selected will have an excellent opportunity to absorb practical information, develop keen powers of observation and prove physical stamina. It would be best if the applicant has a sophomore standing in college with several science courses and previous work experience.

TO APPLY FOR THIS POSITION PLEASE CONTACT:
